

CENTER FOR INTEGRATIVE CARE

Peripheral Neuropathy Clinic for patients with cancer

This specialized acupuncture clinic is targeted to treat neuropathy of the hands and feet. Licensed acupuncturists from the BCH Center for Integrative Care (CIC) will provide these treatments.

Research has shown that targeted acupuncture treatments can be helpful for chemotherapy-induced neuropathy. Targeted acupuncture sessions for neuropathy at a frequency of 2-3 times per week have shown improved outcomes. The peripheral Neuropathy Clinic sessions will focus on neuropathy only and will not address other side effects of chemotherapy. These clinics are intended for patients needing intensive treatment which is found most beneficial for treatment of neuropathy.

Please talk with your acupuncturist at CIC to decide how many times a week will be best for you.

Neuropathy treatments will be 20-30 minutes in length, and patients will need to schedule an appointment time.

When

Mondays: 9:00 - 11:30 a.m.

Wednesdays: 12:00 - 3:00 p.m.
