Get a HeartScan for Half Price

A HeartScan is a safe, painless and fast method for measuring the calcium (plaque) level in your coronary arteries. Measuring plaque has proven to be a good predictor of future heart problems. Early detection is vital, because the development of heart disease can be slowed or even reversed by proper medical management and lifestyle changes.

Scans are appropriate for individuals with risk factors for heart disease, as well as those who want reassurance about their personal health. BCH HeartScans are reviewed by board-certified radiologists and a written report is mailed within 48 hours. If your scan indicates a problem, a radiologist will call you or your physician.

These half-price HeartScans are available thanks to the generosity of grateful patients Leonard and Nancie Velick, who wanted to honor Dr. Jamie Doucet — one of Boulder Community Health's most gifted cardiologists — by donating the funds to make a limited number of discounted HeartScans available to our community during February, which is American Heart Month.

The discounted rate of the scan will be \$87.50 (half the normal rate) per patient. These scans are available for adults 50+ on a first come basis, while supplies last, at these two BCH locations:

Community Medical Center in Lafayette (CMC)

1000 W. South Boulder Road
Lafayette, CO 80026

Erie Medical Center

101 Erie Parkway
Erie, CO 80516

Schedule Your HeartScan

Call 303-415-5170, beginning on January 27, 2020.

Patients need to mention offer **HEART2020** to receive the discounted rate and will need to pay the \$87.50 at the time of service. Scans must be performed in February.
